

Macon County GIS Data Distribution Policy

Georeferencing System

All Macon County GIS data is distributed in the State Plane East coordinate system.

Format

Parcel-based GIS data and all other vector datasets are distributed as ESRI ArcInfo™ shapefiles. Database information is distributed as Microsoft ACCESS™ (.mdb) files. Orthophotography is distributed as uncompressed TIFF files. Special requests for GIS data in other formats will be considered. Macon County will not provide the computer software or hardware needed to access the data.

Media

All digital data is distributed according to the fee structure shown below on CD. Special requests for data distribution on other media will be considered.

Orthophotography

6 inch pixel resolution color urban digital orthophotography (2005)

12 inch pixel resolution color rural digital orthophotography (2005)
